

Tai Markman

Stanford, CA | markman1@law.stanford.edu | [linkedin.com/in/tai-markman/](https://www.linkedin.com/in/tai-markman/)

Fields of Interest: Applied Microeconomics, Political Economy, Public Economics, Economics of Crime and Discrimination, Labor Economics

Education

Georgetown University – Washington, DC

May 2025

Bachelor of Arts: Political Economy; Minors: Statistics and Computer Science

Cumulative GPA: 3.967/4.0 (Political Economy: 3.909); *Magna Cum Laude*; Honors in Political Economy Major

Coursework: Multivariable Calculus, Linear Algebra, ODEs, Intermediate Micro/Macro, Microeconometrics

Papers

“Crime on ICE: Local Police Behavior and Immigration Enforcement in the United States” (Donohue, Markman, and Baldwin), NBER Working Paper No. .

“Loaded Chambers: Organized Interests, Public Opinion, and Policy Responsiveness in the American States” (Iwasaki, Baldwin, Donohue, and Markman), NBER Working Paper No. 34970.

“Ballots Beyond Bars: Understanding the Role of Information Costs in Voter Turnout for Those With Felony Convictions”, *Carroll Round Proceedings*, Vol. 20 (2026): 177–201.

Research Experience

Stanford Law School – Stanford, CA

Empirical Research Fellow (Pre-Doctoral), with Prof. John Donohue

June 2025 – Present

Completed coursework in Real Analysis at Stanford University to strengthen preparation for PhD-level theory.

- Analyze 16,000+ police agencies using two-way fixed effects and staggered difference-in-differences methods to study how immigration-enforcement responsibilities affect local policing and crime outcomes.
- Lead quantitative researcher for the Three Strikes Project’s Racial Justice Act (RJA) litigation under Prof. Michael Romano: conduct statistical analyses of California sentencing data across 40+ active cases and manage related public-records requests.

Free Our Vote – Washington, D.C.

Research Assistant, with Prof. Neel Sukhatme and Prof. Alexander Billy (Georgetown)

August 2023 – May 2025

- Built browser-automation web scrapers (R: RSelenium, httr, rvest) and custom HTML/XML parsers to extract and structure court records from county clerk databases with no public APIs, across 150+ counties in Georgia, Texas, and Pennsylvania.
- Drafted and submitted formal open-records requests to Clerk of Court and County Attorney offices in 10+ Georgia counties, persisting through multi-round correspondence to obtain fines/fees data unavailable online.
- Independently designed and analyzed a randomized controlled trial evaluating a Pennsylvania GOTV campaign for honors thesis: found a 12% increase in voter registration among formerly incarcerated individuals, with no significant effect on turnout, pointing to structural barriers beyond information access.

Other Professional Experience

Federal Reserve Bank of Atlanta – Consumer Compliance Intern, Supervision and Regulation May – Aug 2024

- Evaluated 20+ institutions’ fair lending compliance; built Power BI dashboards tracking violations across 30 institutions.

Resolution Economics – Research Assistant

Aug 2022 – May 2023

- Supported wage-and-hour and employment discrimination litigation across 20+ cases; used SAS to evaluate 50+ datasets for use as court evidence.

Academic Activities

Carroll Round International Economics Conference – Washington, D.C.

Chair (formerly Logistics Co-Chair, Recruitment Chair, Equity Chair)

September 2021 – May 2025

- Led the steering committee of the leading undergraduate international economics research conference in the United States; evaluated 100+ submissions and their econometric approaches for selection.

Georgetown University – Washington, D.C.

Undergraduate Teaching Assistant, Principles of Microeconomics (Aug 2024–May 2025) and Intro to Mathematical Statistics (Aug 2023–May 2024)

- Conducted weekly recitations and held office hours for 100+ students in Microeconomics and 30 students in Mathematical Statistics.

Skills

Software: R, Python, Stata, SAS, C++, Power BI

Methods: Instrumental variables, regression discontinuity, difference-in-differences / two-way fixed effects, synthetic control, item response theory, shift-share designs
